

Welcome,

Thank you for your interest in articulating your course with the Automotive Technology program at Wenatchee Valley College (WVC). Our goal is to partner with high schools in raising the bar in academic standards for students, and to encourage continued study of professional technical programs at WVC. Our decision to partner with local high schools is the first step in building bridges for students within our state and local communities.

To meet the academic requirements of Wenatchee Valley College, we need a snapshot of your curriculum to be submitted for consideration. To ensure equivalency as students move on to post-secondary education and career pathways, each program has specific requirements in content, instructional delivery and student expectations. If the submitted materials are found to be of caliber of WVC college program standards, your school can offer your students college credit through WVC.

You will be submitting a completed evaluation packet including your aligned syllabus and CTE frameworks. Below is a list of additional requirements for this specific course.

Syllabus –Add the following statement to the course syllabus.

- This course is part of the Automotive Technology program at Wenatchee Valley College.
- To find more information about this program, please visit the program site at: <https://wvc.edu/learn/programs/auto-tech/index.html>.
- For more information, contact WVC Automotive faculty advisers: Bob Greiner at rgreiner@wvc.edu or Tom Doherty at tdoherty@wvc.edu.

Teachers are encouraged to collaborate with WVC program coordinators to promote transition to WVC programs.

Wenatchee Valley College is looking forward to partnering with you.
